CAREER OBJECTIVE

Seeking an entry-level React Developer role in a growth-oriented organization to contribute to enterprise-level web application development using React.js, REST APIs, and Agile methodologies while delivering quality-driven solutions.

PROFESSIONAL SUMMARY

- Developed scalable and reusable UI components using React.js following component-based architecture principles.
- Implemented state management using Redux and Context API for efficient data flow across applications.
- Integrated RESTful APIs using Axios/Fetch for dynamic and real-time data rendering.
- Optimized application performance using React Hooks, memoization, and lazy loading techniques.
- Designed fully responsive web interfaces using HTML5, CSS3, Bootstrap, and Tailwind CSS.
- Implemented secure authentication and authorization using JWT-based login systems.
- Followed Agile methodology and SDLC best practices in project development lifecycle.
- Ensured cross-browser compatibility and mobile-first design approach.
- Applied clean coding standards, modular folder structure, and proper error handling practices.
- Used Git and GitHub for version control, collaboration, and code management in team environments.

TECHNICAL SKILLS

Frontend	: React.js, JavaScript, HTML5, CSS3, Tailwind CSS
State Management	: Context API, Redux (Basics)
Backend Basics	: Node.js, Express.js
Database	: MongoDB (Basics)
Tools	: Git, GitHub, VS Code, Postman
Concepts	: REST APIs, JWT Authentication, MVC Architecture, Responsive Design, Agile Methodology

INTERNSHIP EXPERIENCE

Company Name : MAHIX INFOTECH
Internship Duration : Dec 2025 – Present
Project Name : Employee Management System
Technologies : React.js, REST API, Bootstrap
Description

Internal web application to manage employee records and attendance

Roles & Responsibilities

- Developed a responsive web application to manage employee records with full CRUD functionality.
- Integrated REST APIs for seamless backend communication and data handling.
- Implemented authentication and role-based access control.
- Designed interactive dashboard with charts and analytics.
- Optimized performance using React Hooks and reusable components.
- E-Commerce Frontend Application, Built dynamic product listing, cart, and checkout modules.
- Implemented routing using React Router and state management using Redux.
- Integrated APIs for real-time product and user data.
- Ensured cross-browser compatibility and mobile responsiveness, Task Management Application. Developed task creation, update, delete, and filtering features.
- Used functional components and React Hooks for state handling.
- Followed clean code principles and modular architecture.

EDUCATION

Bachelor of Engineering in Computer Science, Anna University. 2021 -2025
